ABSTRACT OF THE INVENTION

The invention relates to a non-aqueous, emulsifiable concentrate (EC) formulation for crop protection active compounds which comprises
(a1) 50 to 300 g/L of at least one azole derivative having a free hydroxy group or a salt or an adduct thereof, preferably a compound of formula I,

wherein, R¹ and R² each independently represent hydrogen atom or an optionally substituted alkyl, alkenyl, alkynyl or alkadienyl group;
R³ represents a halogen atom or an optionally substituted alkyl, alkenyl, alkynyl, alkadienyl, alkoxy or aryl group;
A represents a nitrogen atom or a CH group; and
n represents an integer from 0 to 2;

(a2) optionally, 50 to 500 g/L of at least one additional fungicidally active compound;

(b) up to 700 g/L of one or more alkoxylates of an aliphatic alcohol,

(c) up to 100 g/L of one or more non-ionic dispersants,

(d) 10 to 100 g/L of one or more anionic dispersants,

(e) 50 to 600 g/L of one or more polar aprotic organic solvents, and

(f) 150 to 500 g/L of one or more non-polar organic solvents, any

(g) up to 5 g/L of one or more defoamers,

and to the use of such a emulsifiable concentrate as a fungicide.
